

REDEFINING DIGITAL POSSIBILITIES

*We don't just build solution, We
build possibilities*

Panorama Infosys Ltd.

Corporate Profile | 2026

JOURNEY

1

1997
Panorama's journey began in 1997 with a far-reaching plan through the export process of the garment industry. This was the first step to where it is today.

2

2002
This is where the journey of Panorama Apparels Limited commenced. Since its founding, the company has played a vital role in supporting the export apparel economy of the country. Through a comprehensive business plan, clear goals, dedicated commitments, and timely initiatives, it has grown from a small-scale operation to a large-scale enterprise.

3

2004
Panorama Washing Plant Limited started journey as another significant milestone for Panorama, adding laundry capacity besides its ready-made garment production facility as part of its manufacturing scope.

4

2006
Established Statel Distribution Ltd.

5

2025
Established Panorama Infosys Ltd.

Founder's Message

Md. Moqsudul Haque Sohel
Founder & Managing Director

My entrepreneurial journey began with a vision to build meaningful businesses through commitment, discipline and long-term value creation.

The foundation of Panorama's journey was laid in 1997 through the export-oriented garment sector. At that time, our focus was to contribute to the country's export economy through quality, hard work and responsible business practices. What started as a business initiative gradually became a journey of learning, growth and transformation. In 2002, Panorama Apparels Limited started its journey as a dedicated manufacturing enterprise. Through clear goals, timely initiatives and continuous commitment, we gradually expanded from a small-scale operation into a stronger business platform. In 2004, Panorama Washing Plant Limited was established as another important milestone, adding laundry and finishing capacity to strengthen our apparel manufacturing ecosystem.

Alongside this industrial journey, my involvement in the technology sector began to take shape. In 2006, Startel Distribution was established as a technology-focused company working in telecom, networking and technology supply and distribution. This became an important turning point in my professional journey, as it allowed me to understand the growing importance of digital connectivity, network infrastructure and technology-driven business solutions. Through Startel Distribution, I gained practical experience in telecom products, network solutions, supply chain coordination, client requirements and technology-based service delivery. This exposure helped me realize that technology is not only a support function; it is a strategic enabler for business growth, operational efficiency and national digital transformation. Over the years, my experience across manufacturing, telecom, networking and technology supply shaped a broader vision: businesses and institutions need reliable digital systems to grow, compete and serve people better. This realization became the foundation for establishing Panorama Infosys Ltd. in 2025.

Panorama Infosys Ltd. represents a new chapter in my entrepreneurial journey. It was founded to help organizations move beyond manual processes, fragmented systems and traditional service models by adopting secure, scalable and intelligent digital solutions. Our purpose is to build technology that solves real problems specially digital healthcare eco-system. From enterprise software, mobile applications and web platforms to cloud-enabled systems, AI-integrated solutions, digital infrastructure and technology advisory.

I believe that innovation becomes meaningful only when it serves a purpose. Panorama Infosys Ltd. carries forward the same spirit that shaped my journey from the beginning — commitment, responsibility, perseverance and the courage to move forward.

THE PANORAMA INFOSYS LTD.

We enable businesses to move beyond traditional software by delivering advanced digital solutions that drive innovation and long-term transformation. Our focus is on building powerful, secure, and scalable digital ecosystems that empower organizations to operate more efficiently, innovate with speed, and achieve sustainable growth.

Headquartered in Dhaka, It's a software development technology and digital transformation company that provides enterprise-grade software, secure digital infrastructure and intelligent platform solutions. Founded in 2025, the company has a clear mission to enable organizations to transform from their traditional operations into an intelligent, scalable and digitally integrated ecosystem. We work as a long-term digital transformation partner to enterprises and government organizations with professionalism and dedication. Strong ethics, collaboration, perseverance, transparency and responsibility are the core principles of everything we do.

Vision

Our goal is to shape a future by harnessing transformative technologies that empower individuals and industries to grow, adapt, and lead.

Mission

We create secure and scalable digital solutions designed to address real-world challenges, foster innovation, and drive growth. By partnering with our clients, we strive to make a lasting impact together.

Values

We are committed to fostering technological innovation and maintaining the highest standards of professionalism and accountability in every aspect of our work. We are constantly improving our processes, capabilities, and solutions to adapt to the ever-changing needs of our customers. In addition, we foster an environment of open communication and shared responsibility to achieve our common goals.

Business Eco System

We operate within a multi-layered digital ecosystem that integrates global technology capabilities, industry expertise, and regulatory alignment to deliver secure, scalable, and future-ready solutions. Our ecosystem is designed to ensure seamless collaboration across all layers of digital transformation.

Strategic Approach

A Structured Framework for Delivering Measurable Impact. Our delivery model follows a structured, outcome-driven framework designed to ensure efficiency, scalability, and long-term value

Transforming Ideas into Intelligent Solutions

FUTURE READY WEB, MOBILE & ENTERPRISE PLATFORMS

The Next Generation of Digital Experiences for healthcare industry

We provide enterprise-grade AI integrated software development services that enable organizations to modernize their legacy data management and fragmented systems, integrate complex digital ecosystems, and accelerate innovation. Our solutions are designed to increase operational efficiency, make faster and more accurate decisions, ensure data security, and scalable architectures that support sustainable business growth by data driven platform.

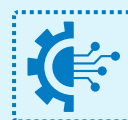

KEY SERVICES

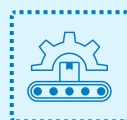

Healthcare Management Software & Application Development

Hospital & Advanced Clinical IoT Devices

Community Health Booth Devices

Advanced Healthcare Tech

PRODUCTS & SOLUTIONS

Healthcare Management Software & Application Development

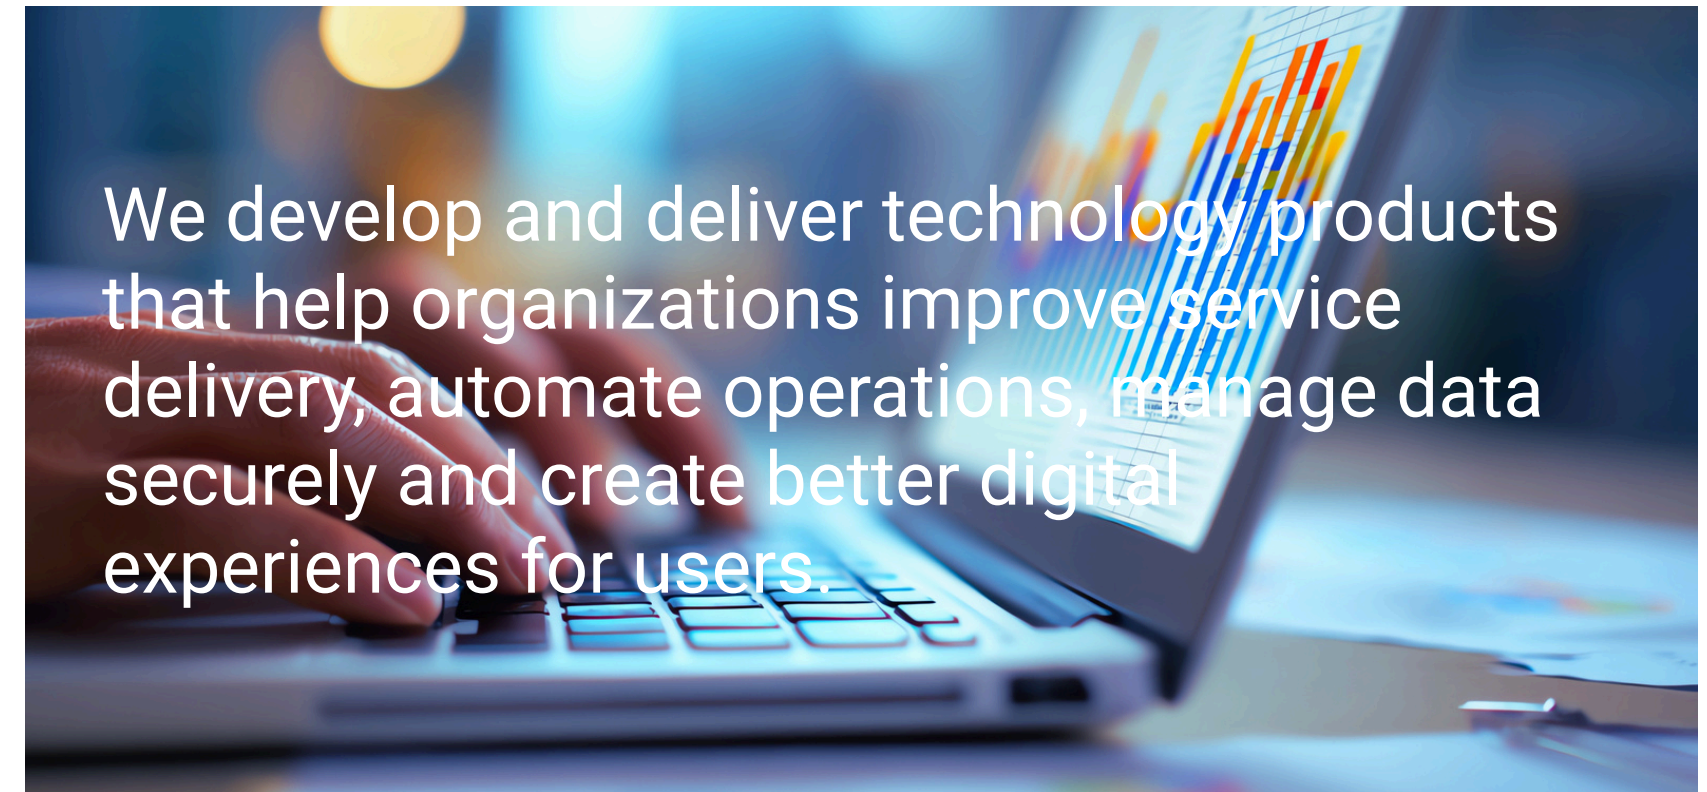

Custom web applications, mobile apps, enterprise systems, SaaS platforms and business automation tools for healthcare services.

Integrated digital platforms for managing healthcare organizational workflows-

HR management systems, inventory systems, procurement systems, asset management platforms and workflow automation tools

User-friendly web and mobile applications

Websites, Pharmacy Ecommerce, Service portals, mobile apps, customer engagement platforms, Telemedicine booking systems and field operation apps, EHR systems, telemedicine apps, doctor portals, patient apps, health card platforms and hospital operation systems.

We develop and deliver technology products that help organizations improve service delivery, automate operations, manage data securely and create better digital experiences for users.

Community Health Booth Devices

Digital Health Kiosk, Smart BP Station, Smart Weighing & BMI Station, Digital Queue + Check-in Device, Smart Prescription Scanner, Smart Medicine Vending Machine, QR/NFC Patient ID Device

Hospital & Advanced Clinical IoT Devices

Smart ICU Monitor, Smart Hospital Bed, Patient Tracking Wristband, Smart Nurse Call System, Smart Asset Tracking Tag, Smart Refrigerator, Smart Sterilization Monitoring Device,

Advanced Healthcare Technology

Smart healthcare devices, Wearables & Fitness Health Devices, Respiratory & Lung Care Devices, Elderly Care & Home Safety Devices, Telemedicine Diagnostic Kit Devices

Smart, interconnected devices that enhance patient outcomes and optimize healthcare operations through IoT solutions for real-time monitoring and data collection. Telemedicine, remote monitoring, and health data analytics, combined with AI-powered tools to improve diagnosis, predict patient needs, and personalize treatment, making healthcare more accessible and efficient.

INDUSTRIES WE SERVE

We provide tailored digital solutions for organizations across multiple sectors. Our industry-focused approach helps clients address operational challenges, regulatory requirements, user expectations and long-term digital growth objectives.

Healthcare & Digital Health

Hospital automation, patient management systems, telemedicine platforms, EHR solutions, health card systems and healthcare service integration.

Smart Cities & Infrastructure

IoT-enabled platforms, service monitoring dashboards, urban management systems, infrastructure reporting tools and citizen engagement applications.

Logistics & Transportation

Fleet management, cargo tracking, booking platforms, warehouse systems, route optimization and digital documentation workflows.

Retail & E-Commerce

Online stores, inventory systems, customer engagement platforms, order management, payment integration and business analytics dashboards.

ONE TEAM
ONE FAMILY
ONE GOAL

TEAM AND EXPERTIES

We are proud of our colleagues, whose relentless efforts have made Panorama Infosys stand on the verge of success today. Our diverse team of engineers, designers, consultants, and industry experts work together to deliver innovative, tailored solutions that drive real results for our clients. Our team's commitment, excellence, and innovative efforts constantly make us confident in achieving our goals.

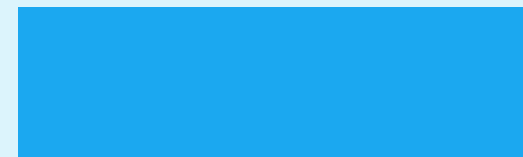

[We operate with a unified philosophy](#)

One Team | One Vision | One Impact

We transform ideas into scalable solutions through

- Cross-functional collaboration
- Agile development methodologies
- Continuous innovation and learning

**We are a resilient,
unstoppable
team.**

Meet our subject matter experts to unlock your possibilities and move forward in building. We redefine your ideas from reflection to reality, whether it's a software solution or infrastructure design or something more.

Enabling Scalable Digital Transformation Through Strategic Collaboration

We stand at the forefront of digital transformation delivering intelligent, secure, and scalable solutions that empower organizations to innovate, evolve, and lead with confidence.

BUSINESS ECO SYSTEM

We operate within a multi-layered digital ecosystem that integrates global technology capabilities, industry expertise, and regulatory alignment to deliver secure, scalable, and future-ready solutions. Our ecosystem is designed to ensure seamless collaboration across all layers of digital transformation.

- Global Technology Partners & OEMs • Cloud & Infrastructure Providers
- Academic & Research Institutions • Industry Specialists & Consultants

Enabling access to advanced technologies, platforms, and innovation capabilities

STRATEGIC APPROACH

A Structured Framework for Delivering Measurable Impact. Our delivery model follows a structured, outcome-driven framework designed to ensure efficiency, scalability, and long-term value

Discover & Assess

Evaluate existing systems, challenges, and business objectives.

Design & Architect

Develop secure, scalable, and future-ready solution architectures

Discover & Assess

Evaluate existing systems, challenges, and business objectives.

Design & Architect

Develop secure, scalable, and future-ready solution architectures.

Develop & Integrate

Build and integrate systems using agile and modular approaches.

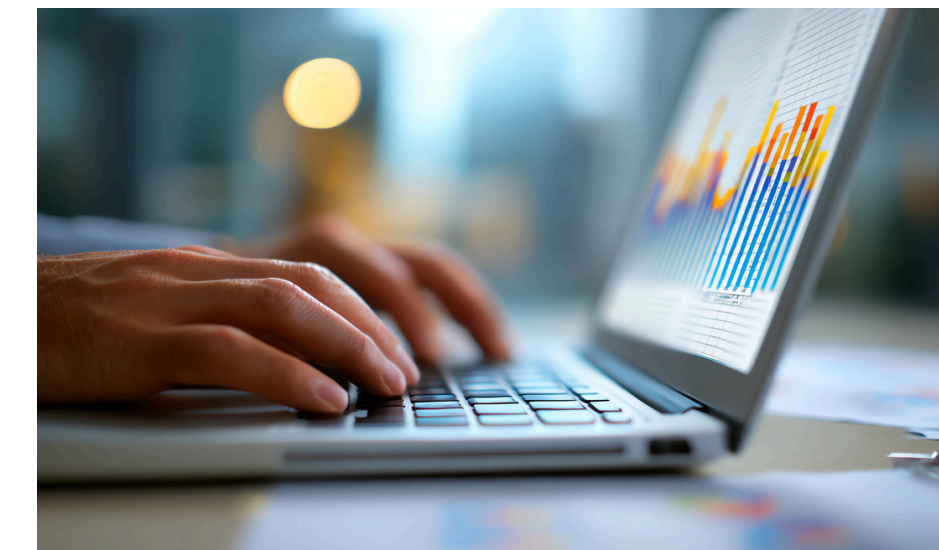

Deploy & Optimize

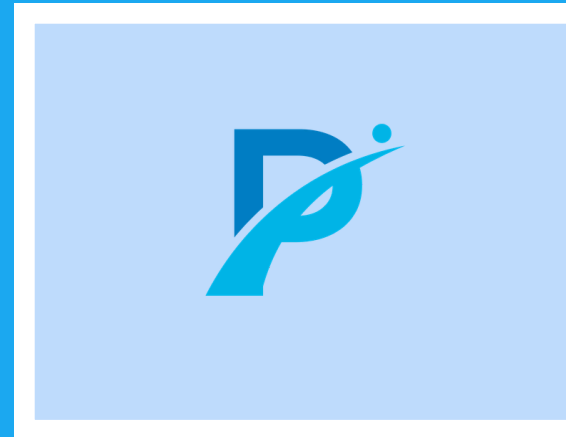

Ensure seamless deployment with continuous monitoring and improvement.

INDUSTRIES WE SERVE

We provide tailored solutions across multiple industries, ensuring alignment with operational needs and regulatory environment

- Healthcare & Digital Health
- Financial Services & Fintech
- Smart Cities & Infrastructure
- Logistics & Transportation
- Retail & E-commerce
- Government & Public Sector

Let's Build the Technology Future Together

Our commitment transcends the mere provision of technology; we aspire to establish a long-term partnership that fosters digital success. Our objective is to nurture a robust professional relationship characterized by our collaborative efforts in creating citizen-centric digital services, marked by excellence and reliability.
